

Project Title - Analyzing Health Data of Maharashtra (Nagpur District)

Methodology -

- Consolidating Excel File
- Data Cleaning and Merging
- Understanding Data and Variables
- Trend Analysis

Tools Used – Data Cleaning and Merging has been done in Python using Jupyter Notebooks whereas the trend analysis is done in Tableau. The purpose of choosing tableau is because of Interactive and Beautiful Graphs.

Analysis and File – The analysis files are shared in Analysis Folder. Tableau Workbook has also been shared.

My learning – I learnt to handle unstructured data. This being the first time I have handles so many excel files and data together. As I am in the process of learning tableau better, I gain more knowledge and learnt a lot.
